

- Purple Table:

1. NO vision - Agenda is pre-set.
Politics plays bigger part than people.
2. Matched in/seamlessly fitted into a living / thriving business area. Heritage.
3. Kilkenny crafts (like Great garden, Artists quarters).
Steeped in history, preserve simplicity, tranquility.
4. Skeptical. Difficult to envision.
Agenda decided.
5. Early formation of Kilkenny. Treat the space seriously.
Can be a massive draw bigger than the castle.
In the future: 9th Century of Kilkenny onwards.
6. Kilkenny specific: Heritage / Arts / Cultural.
Integrated into the offer of the city. Sense of ownership. Space is vibrant. The overall vision of the site should be guided by guidelines for the site. reflects engagement of the community. Intimate place - scale is sympathetic.
7. Crucial inner city site: that will determine the future of an inner city site.
Finally Agreed a sustainable vision on 15th Nov 2035.

Review decisions made already

Importance of Natural + Built Heritage - ~~Natural + Built~~
Health of the site, location, heritage.

- ① Archeology + Environmental Assessment carried out first.
- ② Planned in its totality / no project splitting
sustainable — Specific
- ③ Premature planning an issue — Mayfair plans issued.

Key issues raised:

1. Prematurity: EIA/EIS Dr.
2. Agenda already set
3. Scope limited - Consultation pre-set.
4. Archeological Investigations first.
5. Process of Consultation - less successful in long term if people are not involved at setting Agenda.
6. Does the executive think the public are intelligent? Capable? Their agenda + public agenda are different?
