

Uimhir Thagarta Uathúil: KK-C162-150
Stádas: Submitted
Submission: castlebanny windfarm

Údar: Cliona Geraghty

Comhairliúchán:
Kilkenny City and County Draft Development Plan 2021-2027

I object to any classification of the immediate and extended locality as suitable or "Acceptable in principle" for wind energy production

Caibidil: Volume One County » 11. Renewable Energy » 11.5 Wind Energy » 11.5.2 Wind Energy Development Strategy

I object to any classification of the immediate and extended locality as suitable or "Acceptable in principle" for wind energy production

Keywords: Biodiversity, Health, Noise

Main opinion:

It is a well established fact that wind energy sources are most productive offshore and/or in the direct and uninterrupted path of the prevailing wind. Not only is the path of air obstructed by the Comeragh mountains, but also the rolling landscape that faces the proposed site. Such proposals are disruptive to biodiversity and human life in the area and this particular proposal has not been fully communicated to the residents in terms of any allowable adjustment to the proposed location of each turbine unit.

Main requests:

Objection to Castlebanny wind farm

Main reasons:

Biodiversity, noise, property devaluation, health implications, no consultation with residents in terms of location of turbine units, no clear communication of project management throughout project and facility life cycle.
