Submission:

Improving Pedestrian & Cycle Connectivity at Aughmalogue Bridge

Comhairliúchán:

Kilkenny City and County Draft Development Plan 2021-2027

The attached proposal should greatly enhance road safety and pedestrian and cycle connectivity in the Purcellsinch area of the city.

Caibidil: Volume Two City» 5. Movement and Mobility Strategy

Consideration should be given to including a specific objective within the revised plan to improve pedestrian and cycle connectivity at Aughmalogue Bridge. Improving connectivity may be achieved by creating a foot and cycle path through the eye of the bridge to the north of the R712. Addressing this issue would contribute towards the development of a compact, 10 minute city, by providing a safe link to the growing variety of facilities in Cillín Hill, including retail, fitness, childcare and employment generally. It would also facilitate pedestrian and cycle traffic to the event centre in Lyrath.

Main requests:

Consideration should be given to including a specific objective within the revised plan to improve pedestrian and cycle connectivity at Aughmalogue Bridge. Improving connectivity may be achieved by creating a foot and cycle path through the eye of the bridge to the north of the R712 as illustrated in the attachment.

Main reasons:

road safety, pedestrian and cycle connectivity.
