To whom it concerns,

We refer to the Report for Appropriate Assessment Screening compile by Moore Group in regard to proposed alterations to the Brew House Buildings, St. Francis' Abbey, Kilkenny.

The report included details of a Construction Environmental Management Plan (CEMP) to be prepared by the Contractor to ensure Best Practice Construction Methods to prevent surface water runoff to the River Nore.

Having reviewed the revised proposals supplied by Reddy Architecture for proposed alterations to design, I can confirm that there is no material alteration to the determination of the conclusion of the AA Screening assessment, in that there would be no significant impacts on the conservation objectives of the adjacent River Nore and River Barrow Natura 2000 sites or any other European sites either alone or in-combination with other plans or projects if the proposed alterations were to proceed including a CEMP.

Yours sincerely,

-----  
Ger O'Donohoe M.Sc.
